

Bus 1&2 can have either Constant-Current or Resistive pullups. From the factory, resistive pullups are standard.

EITHER:  
Use 9 pin R3 resistive pull-ups (default)  
OR  
Fit constant current generators (Q1,2+resistors) and R3 with last 2 pins removed.

C10,11 only fitted with Crystal. Default is Ceratlok with built in capacitors
